FARMERS PLANT COMPANY

ONION PLANTS

READY FOR SHIPMENT NOW!

ONIONS! ONIONS! ONIONS!

ready now—Ready to grow for you into large, sweeter and more abundantly than any you ever planted.

Our Onion Plants come to you in Bunches like this—100 to the Bunch. Bunch.

It is not only economy to plant onion plants but it is the thing to do because plants produce larger, sweeter, and more onions, than when sets are planted. Onions grown from plants have a wonderful sweet flavor and are not hot as are onions grown from sets. Our plants produce large fine onions satisfactory in every way, evidenced by the fact that each year we get reorders from satisfied customers and many new orders from friends of those who use our plants.

Try a thousand or so of our Bermuda and our famous Spanish Onion plants. You will like them much better than sets.

Onion plants are very easy to grow. If, when our Onion plants arrive, you are not ready to set them out just keep them dry and do not let them become heated and they will keep indefinitely.

To grow Onions successfully, of course, the richer the soil the larger the crop, but Onion plants produce very satisfactory in all classes of soil.

Land should be prepared for onions the same as for other garden truck, and set them out in rows 14 to 16 inches apart and plants 4 inches apart in the rows.

To set out plants make a hole with a stick, about two inches deep, place the plant in it and press the earth firmly about it.

Cultivate very shallow. Scratch about them to kill weeds.

Harvesting Onions.—When tops begin to droop and are soft at neck, pull them up and let them lie in the sun for a few days to allow the top to descend into the onion which increases its weight. Store onions in a cool, dry place away from light.

Plant Your Own Living First

The best thing that should come out of a depression and a dry year is the lesson that all should look to their own living first.

Why not "plant your living" instead of depending upon some certain crop to supply it.

There is always as much to be made by planting a good garden of Onions, Cabbage, Tomatoes, Sweet Potatoes, Peppers and other garden truck which can be eaten or sold as there is from a cotton or grain crop.

Get In A Good Garden This Season For Your Own Living and the Market.

Order Plants From Us—Now!

The best Farm Relief we know of for the coming season is for everybody to plant a good garden. Plant your living first.

ONION PLANTS

ORDER ONION PLANTS NOW!

SWEET SPANISH ONION PLANTS

Prizetaker—The King of the Yellow Onions, a big yielder and a sure cropper. The most productive and largest of all the yellow globe onions. Always grows to a uniform shape which is a perfect globe. Invariably attract attention on the markets on account of its size and beauty and is sure to bring a better price than other onions. They are even more attractive than the large Spanish onions, in fact these are excellent substitutes. Plants grown from American-Grown seed.

Sweet Spanish Onions—Are long keeping onions of the large Spanish Valencia type, being large and at the same time a better shipper and better storage onion than the well-known Prizetaker. This onion is not recommended for South Texas where it has not been altogether satisfactory. In other districts this onion has been grown in a large way commercially and is a splendid onion for home gardens. Sweet Spanish Onions will ripen down evenly and are extremely mild. It is of uniform globe-shape and because of its bright golden color is fast becoming a great favorite.

Centerville, Texas,
Feb. 1st, 1930.

Farmers Plant Co.,
Texarkana, Texas.

Dear Sirs:

Will you have the Texas Certified Sweet Potato Plants this year? I got some from you last year and I liked the potato plants fine.

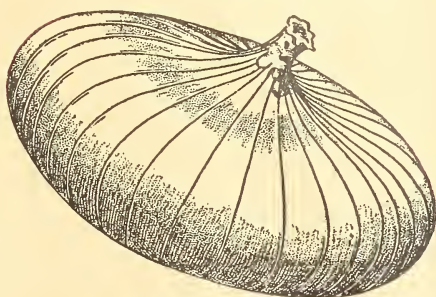

If you have any of these plants this year be sure to let me know at once. I sure do want to get some more of the plants from you.

MISS FANNIE HORN.

BERMUDA ONION PLANTS

Bermuda plants make quicker and yield large saucer-shaped onions, with very small tops—not hot and strong—and they keep.

Yellow Bermuda—Sometimes called White Bermuda, although it is a light yellow or straw colored onion. This is the better keeper because the light does not penetrate to the onion as with the white. It is a flat, very mild flavored variety of high quality. An early onion.

White Crystal Wax—A rather new variety. Large pure white flat onions, popular with southern onion growers. Mildest and sweetest of onions. Fine for slicing. This onion, however, is not as good a keeper as the Yellow Bermuda. This is also an early onion.

Order Plants From Us—Now!

Our Plants are shipped to you fresh—the day they are pulled.

FARMERS PLANT COMPANY

CABBAGE PLANTS

READY FOR SHIPMENT NOW!

Plant Cabbage For Home and Market

Plant plenty of cabbage this season as cabbage is a splendid food for the table and always has a ready market. Plant cabbage and make your own Kraut and Kraut Juice. Buy your plants from us and raise your finest and most abundant crop.

Hardy "Frost Proof" Cabbage Plants—50 Plants to the Bunch. READY NOW—TO JUNE 15TH By Parcel Post—Prepaid

Our Frost-Proof Cabbage Plants are the safest and surest to plant. They are grown in the open field subjected to the frost and freeze and consequently are strong, hardy plants.

Our plants are all hand-picked, one at a time, and are shipped to you tied in bunches of 50.

If you cannot set your plants out on arrival unpack them immediately, dip the roots in water and hill out into the ground spreading the bunches out a little. DO NOT LEAVE THEM IN THE CRATE.

If, when the plants arrive, they look stunted and wilted, don't let it bother you. Plant every one of them. Plant them a month before you would plant home grown plants.

Order your Cabbage Plants now. Plant them early and be on the Market early when prices are at the top.

CABBAGE PLANTS

ORDER CABBAGE PLANTS NOW!

Our Varieties of Cabbage Plants

Copenhagen Market—A big yielder, extra early. Fine round heads, averaging 8 pounds; very solid; small core. Plants are short-stemmed, heads being produced almost on the surface of ground. Ready for market as early as Jersey Wakefield and heavier yield per acre.

Early Jersey Wakefield—A favorite with market gardeners and truckers to grow for earlier Cabbage, both for home market and shipping. Makes compact, solid, blunt-pointed heads; small leaves, permitting close planting. Very hardy, not only to resist cold but other unfavorable conditions. Our plants are properly grown and selected with care.

Charleston Large Type Wakefield—Extra large, hardy, good shipper. A splendid strain of Jersey Wakefield, about a week later, with heads twice as large and weighing 8 to 12 pounds more. A good keeper and a strong favorite among southern growers as a main crop. May be planted as a second crop, to mature in autumn, if desired.

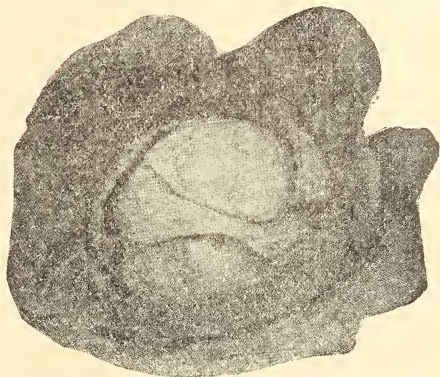

Succession—Largely a market growers' variety in many parts of the South, being used almost exclusively for shipping crops. Rather large size, well flattened on top. Firm and solid, a sure header and good shipper to North. Matures about ten days later than Early Summer and Early Flat Dutch, but nearly double their size.

Large Late Flat Dutch—An excellent keeping variety, more extensively grown

for main crops than any other variety. This is one of the oldest varieties and needs no recommendation. Heads large, broad, roundish flat; solid and of good quality, tender and fine grained. Resists heat splendidly.

Early Flat Dutch—One of the most reliable cabbages for early spring planting. Plants are short-stemmed, upright, and having comparatively few and short leaves, the rows can be set close together. Heads large, solid, crisp and tender. Excellent for home use and to follow Wakefield and Succession.

Golden Acre—An excellent cabbage, the

most desirable and big money making variety for the market gardener or for home uses. The earliest round head cabbage. Very solid. Head is firm, crisp and solid with center of clear white. Outside color medium light green. Average weight is eight pounds. A splendid keeper.

Glory of Enkhuizen—This cabbage is only 10 days later than the Jersey Wakefield, but heads twice as heavy, ball-shaped, thin ribbed, very firm, splendid keepers, and of excellent quality. The color is a pale green. In appearance the heads are those of a small Danish Ball-head. Plants grow very uniform in size and shape and always head.

From Another Satisfied User of Our Plants

Road Fork, Ky.,
March 4, 1930.

Farmers Plant Association,
Texarkana, Texas.

Dear Sirs:

Please send me your latest prices on plants. Our Sweet Potatoes did well last year.

Thanks for reply.

5000 plants and over, by express collect, per 1000	\$1.75

Here is another good food item for your garden. Sweet Potatoes for the table are hard to beat. And as an item to market they are good money producers. They always are in demand and bring a good price. A few bushels in your cellar would surely be enjoyed by every member of the family. And cut down the grocery bill.

TEXAS STATE CERTIFIED SLIPS

Porto Rico—This is the most popular southern variety of sweet potato and is the most generally grown. Porto Ricos are moist potatoes and there's a big and steady demand for them.

Nancy Hall—This is another favorite southern sweet potato, almost equal in popularity and demand as the Porto Rico. A good and easy grower and shipper and highly marketable.

PEPPER PLANTS

Chinese Giant—140 Days—Large chunky peppers, bright scarlet when ripe, mild to eat, beauties to look at, 4 to 5 inches across and 4½ inches long.

Bull Nose or Large Bell—120 Days—Old standby. Large fruit, thick flesh, with broad end, almost square. Deep green when young, bright crimson when ripe. Mild flavor. Plants. 2 feet high.

Ruby King—110 Days—General favorite; most generally used. Longest of the largest! Brilliant red, 10 to 15 fruits to plant. Flavor sweetish; free from heat. Resists decay longer.

Long Red Cayenne—100 Days—Very hot, bright red pepper, long and slender. Fruit about 3 to 3½ inches long, ½ inch across at stem, end twisted to a point.

Gulf State Market—100 Days—Very productive; excellent shipper because of tough skin. Globular shape, free from cracks. Color, purple and pink. Hardy vine.

Early Detroit—110 Days—A smooth globular shaped tomato of good quality. Large, early, productive, solid variety, flesh purple.

Greater Baltimore—110 Days—Large, solid, round, red, blemish-free fruits. Main-crop variety as fruiter. Stout vines. Continuous cropper. Very dependable.

New Stone—115 Days—Great favorite in all gardens; used extensively by commercial canners. Late sort. Productive—large, solid, bright red, smooth fruit. One of the most popular tomatoes.

Livingston's Globe—Very productive, extra good all-around tomato, distinct globe shape. Always smooth, firm-fleshed, few seeds. Color, purplish pink. A very good keeper.

June Pink—90 Days—The earliest pink variety on the market. Solid fruit, borne in profusion. A large, red, smooth tomato, medium size, nearly round.

McGee—Of Texas origin. Bright crimson, solid, good flavor. Especially recommended for black land. Claimed to yield where other varieties fail.

Earliana—90 Days—The earliest, large, red, smooth tomato on the market. Healthy vines with small foliage. Very productive. Medium size fruits, nearly round. Popular with canners.

Marglobe—This is a super-standard strain; is a week later than Bonnie Best and is highly productive. It has a handsome appearance and its globe shape depth makes it a fine tomato for slicing.

Dwarf Champion (Tree Tomato). (110 days.) Vines grow dwarf and compact; stems thick and short. Extremely hardy and can be set out very early. Purplish pink color; medium quality.

INCLUDE THIS IN YOUR ORDER AND HAVE HEALTHY FEET

TRICHICIDE

AN EFFECTIVE TREATMENT FOR SORE, ITCHY FEET
